

9 Essential Skills for the Love and Logic Classroom

The training seeks to arm educators with the skills that allow relationship building while enhancing instructional focus and practice. The skills are designed to address student needs as well as parent desires to increase school to home partnerships and communication. Thus, it is a holistic approach.

- Classroom management Skills
- Home-school connection solutions
- How to end student arguing and set limits without lectures
- Skills to prevent problems and save time for teaching
- Help end student arguing and back talk
- Guide kids to own and solve their problems
- Build positive relationships with challenging students
- Raise test scores
- Prevent problems and save teaching time
